## TWO STUDENTS SAVE LIFE OF SAINT LEO COED

By Theresa Schretzmann  
Monarch Editor

Students Gina Wieneke and Joann Keys were put to the ultimate test of recently acquired first aid skills when they saved the life of a Marmion Hall coed four times on Friday, October 29th, at 11:30 p.m., and later during the course of the morning at Dade City Community General Hospital.

Apparently, the coed had consumed a quantity of alcohol along with a simple cold medication, this and other circumstances resulted in physical difficulties. Said Gina, "The first I saw of the girl was when some girls carried her into the shower at Marmion dorm to try and 'sober her up'. I was alarmed because it seemed apparent by her condition that she was not drunk but drugged. I thought that something more seriously was wrong because her head was drooping backwards, she was crying, and she was in and out of delirium. I wasn't sure, so I went and got Joann to verify that I wasn't reading the symptoms wrong."

Said Joann, "I walked into the shower room and found 3 girls holding the one girl up in the shower. Apparently they thought that the shower would help her out of her drunkenness. The girl was incapacitated, incoherent in her speech, and was whimpering as if in distress. I told the girls that all a shower does is make a drunk wide-awake, and the best thing they could do would be to take her in her room and let the alcohol be absorbed through her system naturally."

Said Joann, "They put her into bed and left. While she was laying down, she threw-up. This concerned Gina and I because we knew from first-aid class that a person can very easily choke on their vomit and die of asphyxiation while laying in a prostrate position. We turned her on her side and decided to stay with her and watch her."

Said Gina, "While we were in the room, we observed that she was having difficulty in breathing. She would be gasping for air one minute and then breathe normally for awhile. Because of the irregular breathing, I went and dialed the operator and asked her to connect me with the rescue squad. Since it wasn't an emergency, she gave me the business number of the San Antonio Rescue Squad. I asked their advice on what we should do. I was told to go ahead and let her sleep, to keep a very close watch on her vital signs, and that if any of her vital signs got worse, to call back."

Said Joann, "We hadn't realized during the previous time how erratic her breathing really was until she stopped breathing the first time for about 20 seconds. I started mouth-to-mouth resuscitation and Gina went to call the rescue squad again." This was at approximately 11:30 p.m.

Said Joann, "During the course of time it took for the operator to get through to the rescue squad, and for the rescue squad to arrive, I had to administer mouth-to-mouth resuscitation 3 times. She would come back breathing and I'd stop mouth-to-mouth, and then she'd quit breathing all together again and I'd have to start resuscitation again."

At 11:58 p.m. the rescue squad arrived at Marmion dorm. Said Bob Cabot, Rescue Volunteer and Assistant Professor of Physical Education, "We questioned Gina on our way up to the room concerning what the girl had been doing, what she drank, and what medication, if any, she had been taking. We approach these emergencies from exactly the opposite position because what is apparent might not be the only problem. We always presume that there is something more serious involved."

Said Cabot, "The girl was completely unconscious and had a very shallow respiration rate. Eighteen is the average rate; her respiration rate was in the area of 6-8. Her pupils were slightly dilated and slightly reactive when they should have been normally dilated and very reactive when exposed to light. If the girls had not started mouth-to-mouth resuscitation when they did, she would not have come back as quickly."

Said Cabot, "If there is delay in giving artificial respiration, chances for a come back are slimmer as time elapses. Four minutes after breathing has stopped, it's a 50% chance out of 100 for recovery. Ten minutes after breathing has stopped it's one chance out of 100 for recovery. Twelve minutes after breathing has stopped it's 1 chance in 10,000 that you'll get a person to recover. I can definitely say that it was to the girl's advantage that Gina and Joann were there and knew what to do."

Said Cabot, "The girl had taken a simple antehistamine called Novafed and later on consumed rum, but it was a combination of that and other circumstances that caused the problem. She had a cold, the medication she was taking for the cold plus the alcohol injected (continued on page 3)

## SURVIVAL AND SUCCESS

By Dan Maguire  
Assistant Editor

America is a wonderful country, the land of the free and the home of the brave-- where anyone, regardless of race, sex, religion, or national origin, can grow up to be illiterate. In fact, there are about 25 million American adults today who have done just that.

Some people will say that the responsibility for the fundamental skills of reading and writing falls entirely on the schools. Others argue that parents must bear some of the burden of teaching Johnny to read.

Most current discussions of the subject deal with what is termed "functional illiteracy." A person who is functionally illiterate cannot fill out a simple job application or read the label on a bottle of medicine. Because we live in "the age of information," these people usually fall through the holes as victims of the great machine.

There is, however, another group that manages to hang on and survive within the system, though the positions generally reserved for them represent the bottom rungs of the ladder. These people are considered to be "semi-literate." They can read and write well enough to get by, but a great deal gets by them.

Surprisingly, some of these "semi-literate" survivors have graduated from college. Proof of this sad fact had been provided by stories of student-athletes who have brought suits against their former institutions claiming that the schools failed by not giving them a quality education. Having gotten through college on an athletic scholarship, these now unsuccessful athletes are finding it difficult to survive in the real world.

Here at Saint Leo something is being done, as it is at colleges and universities around the country, to eliminate the possibility of students leaving as semi-literates. "We can make a Saint Leo diploma mean academic literacy," says Dr. Mark Edmonds, the Director of Learning Assistance Services.

"We can make Saint Leo a place where a quality education can be gotten," Edmonds said, emphasizing that he feels education must be actively sought and not passively received.

In his position as director, Edmonds is in charge of the reading and writing labs which are designed to help students who need assistance in those areas at a fundamental level. "We aim for academic survival first and academic success second," said Edmonds.

Incoming students who are enrolled, via testing, in either English 112 or English 120 are required to spend a specific number of hours in the appropriate lab where they received the individual attention not always possible in a classroom setting.

Developmental programs exist at a majority of colleges and universities throughout the U.S. according to Edmonds, who pointed out that even Harvard boasts of one. A unique aspect of Saint Leo's program is that it's the only one, as far as Edmonds knows, that combines classroom lectures with mandatory lab time.

This combination fits right in with Edmonds' basic philosophy about what education should be. "It must be practical and relevant," Edmonds said continuing, "We teach them to think."

Obviously, the student's attitude is important in this process and Edmonds applauds his staff for generating interest in the labs. All of the professional tutors; Tom Abrams, Lynn Deurloo, Steve Immasche, Mary Kay Madden, O'Neill Phillips, Kurt Van Wilt and Paul Whidden have at least a master's degree in English and work ten, twenty, or thirty hours per week in the labs. Backing up the professionals are twelve work-study students who serve as assistants.

"I think my enthusiasm, as well as the enthusiasm of the tutors, has established a sense of commitment," said Edmonds, who has a doctorate from the University of Michigan. "We try to make them (the students) feel like they are a part of something and teach them what that something is," he said.

Despite his enthusiasm for his work here at Saint Leo, Edmonds does not feel that the overall battle against illiteracy has been successful. "I've been involved in developmental programs for 15 years and the literacy level (of students entering college), has declined steadily for all those years. Sometimes I feel like I'm teaching an antiquated craft," Edmonds mused.

Faulty secondary education is often blamed for such problems, but Edmonds does not agree. "High Schools are a symptom of society as a whole," he said. Edmonds blames what he sees as "a less important role" that education now plays in our world. Says Edmonds, "I don't see the level of education increasing," explaining that he feels that education now is mostly in the hands of administrators and other non-educators.

Edmonds pointed out that prior to the 1960's, when education became an equal opportunity affair, only those who could afford the price of tuition were attending college and they usually come from well-to-do backgrounds that included a knowledge of fundamental skills. Now that anyone can get in, people who are unprepared academically are accepted.

Realizing the need for developmental programs, Edmonds is one-hundred percent behind Saint Leo's effort in that direction. "It's a good program," he said, "and besides, it's damn hard work."

# SIXTEEN SAINT LEO SELECTED FOR

By Joy Shepherd  
Director of Public Information

Sixteen students from Saint Leo College were selected for inclusion in the 1983 edition of "Who's Who Among Students In American Universities and Colleges."

Academic achievement, service to the community, leadership in extracurricular activities and future potential was the criteria used by the campus nominating committee and editors of the annual directory in the selection process.

Among the students were:

**Tresea R. Berry**, daughter of Mr. and Mrs. Carl H. Berry, Sr. of Plant City, Florida.

Tresea is a senior at Saint Leo with a double concentration in psychology and social work. Her campus activities include being a Resident Assistant in Henderson residence Hall, pledging with Delta Phi Delta Sorority in her sophomore year and serving as its Pledgemistress; being chosen as a "Little Sister" to Sigma Phi Epsilon Fraternity; serving as Secretary to the Student Government Association for two years and as Treasurer for one year; membership in Gamma Alpha Honor Society; serving as the Athletic Director for two years; and serving as the sports editor for the student newspaper, *The Monarch*, for two years.

Berry entered Saint Leo in her freshman year on a basketball scholarship and played forward on the Lady Monarchs squad for three years. She has been a member of Campus Court since 1980 and served as its Vice President and was selected for inclusion in the *National Register of Outstanding College Graduates*, 1983.

She is a 1979 graduate of Plant City High School.

**Mary Ann E. Demeo**, daughter of Mr. and Mrs. Anthony J. Demeo of Dunedin, Florida.

A junior at Saint Leo with concentrations in pre-law, history and political science, Mary Ann holds membership in College Ministry and on its executive board; Circle K International, of which she is Treasurer this year; is a member of the Music Ministry; holds membership in and serves on the executive board of the Pre-law and Debate Society; is the junior Class Representative to the College Union Board; is a member of Gamma Alpha Honor Society; is active in Special Olympics for Pasco County; was a reporter in her first year for the student newspaper, *The Monarch*, and last year served as its News Editor, for which she received the "Outstanding Monarch Newspaper Reporter" award.

In her sophomore year she was the recipient of one of the "Outstanding Student" awards. This year she serves as a Senator in the Student Government Association and as a member of the public relations board for SGA.

Demeo is a 1980 graduate of Dunedin High School.

**Peter C. D'Souza**, son of Mr. and Mrs. Edward D'Souza of St. Louis, Missouri.

A 1979 graduate of Maplewood High School in Richmond Heights, Missouri, where he was the captain of the soccer team in his senior year and received an Honorable Mention to the All-State Soccer Team, he has been a member of the Monarch Soccer Team all four years and was named "Midfielder of the Year" in his sophomore year.

In his freshman year, he received the award for the "Highest Cumulative Grade Point Average" for his class and was the recipient of a ROTC Scholarship.

Later he achieved membership Gamma Alpha Honor Society and was also an active member of the intramural soccer team in his freshman and sophomore years.

During his junior year he was Vice President of the International Club, of which he qualifies for membership as a Native of India, and became the ROTC Raider Commander.

After completing six weeks at Fort Bragg, North Carolina, he has been promoted to the rank of Cadet 1st Lieutenant in ROTC and was a member of the first Alumni Homecoming King's Court during the annual Alumni Homecoming festivities.

**Darlene A. Dumond**, daughter of Mr. and Mrs. Joseph Dumond of East Hartford, Connecticut.

Dumond is a senior at Saint Leo with a concentration in social work. In her freshman year she pledged with Alpha Sigma Sorority, served as the pledge mistress and on the disciplinary board in her sophomore year and as vice president in her junior year. She has been a member of Panhellenic since her sophomore year and is serving as its president this year.

Her activities in the Social Work Club include membership since her freshman year, serving as its secretary/treasurer last year and on the advisory board this year. In addition, she has been actively involved in working with the College's Social Science Division in the accreditation of its Social Work Program, which should be completed next February.

Dumond has been a member of the College Union Board for four years; was a volunteer worker for the campus "Helpline" for crisis prevention in her junior year; is the senior class representative to the Student Government Association; was a member of the Greek Goddess court in her sophomore and junior years; has participated in intramural sports and served as an Orientation Leader this fall.

She is a 1979 graduate of George J. Penney High School in East Hartford and her father is the owner of J & M Grinding, Inc. in Manchester, Connecticut.

**Ingrid T. Forbes**, daughter of Mr. and Mrs. Ainsley Forbes of Kingston, Jamaica.

One of five children, she is a senior at Saint Leo with double concentration in special education and elementary education and has been at Saint Leo since her freshman year.

Her activities have included four years in Circle K, of which she is currently President, she was Vice-President last year and has encompassed innumerable community service projects in which she had either participated or coordinated.

In her freshman year she pledged in Alpha Sigma Sorority and served in her sophomore year as its corresponding secretary and last year as its social director.

In addition, she has been an Orientation Leader for three years and was recognized in 1980-81 when voted "Outstanding Junior".

With a cumulative grade point average of 3.32, she is a member of Gamma Alpha Honor Society, and received the 2nd place award in Florida District for Outstanding Club Vice President for Circle K last year. She has been a Senator in Student Government for the past two years; was a member of the Alumni Homecoming Queen's court for 1981-82; and 1982-83; and served as a costume consultant to the Greek Festival last year and to the Irish Festival this year.

**Jose A. Matos**, son of Mr. and Mrs. Jose R. Matos of Landisville, New Jersey.

Matos is a senior at Saint Leo with a concentration in business management. His campus activities include serving as a Senator to the Student Government Association for two years, SGA Vice President-Pro-Tem for 1982-83 and chairing the Beautification Committee for the campus for the 1982-82 academic year. In addition, he pledged with Alpha Sigma Chi Fraternity in his freshman year and served as its Secretary in his sophomore year and President last year.

This year he is Vice President of the senior Class, served as an Orientation Leader, has been active in intramural sports for four years, is a member of the Student Library Development Committee for 1982-83 and last year served on the Greek Festival Committee.

Matos has served as a representative to the Inter-Fraternity Council for two years.

He is a 1979 graduate of Buena Regional High School in Buena, New Jersey.

**Eileen M. McGlinchey**, daughter of Mr. and Mrs. Frank P. McGlinchey of Bayonet Point, Florida.

A senior at Saint Leo with a concentration in the pre-law program, she is a 1980 graduate of Hudson Senior High School, has a cumulative grade point average of 4.0 and is a member of Gamma Alpha Honor Society.

In her freshman year, she pledged with Psi Theta Epsilon Sorority and served as its Vice President last year. For the past two years she has been a resident Assistant in Snyder Women's Residence Hall and has been a Senator in the Student Government Association, serving this year as the Co-chairman of the SGA Dorm Life Committee. Last year she served on a Committee of '82, a fund-raising committee for Library Development, through SGA.

Last year she also served as an Orientation Leader and was a member of Panhellenic. For the past two years she has held membership in the Pre-law and Debate Society and this year serves on its executive board.

On October 17, 1982, she was installed as Eucharistic Minister for the College Ministry program.

In addition, since March of 1980 she has been writing an opinion Column, *My view*, for the *St. Petersburg Times*, Pasco, Citrus and Hernando editions, on a volunteer basis. In April 1981, she began a part-time position as a sports and news correspondent for the *Pasco Times*, a position which she still holds.

Last month she was chosen by the Alumni Selection Committee as "1982-83 Alumni Homecoming Queen" and crowned during the annual Alumni Homecoming festivities.

**Vickie L. McGough**, daughter of Louis and Nancy McGough of Mt. Laurel, New Jersey.

The second of seven children, she is a 1979 graduate of Lenape Regional High School, is an eleven year student of dance and toured with a local studio at the age of ten. At the age of 16, she opened her own dance studio and taught children ballet, tap, jazz, hawaiian and acrobatics.

With a cumulative grade point average of 3.70, she is a member of Gamma Alpha Honor Society and is a senior with a double concentration in dance and arts management. Last year she served as Parliamentarian/Historian in Gamma Alpha, and has been a tutor for other students in its Tutorial Program since 1980.

She has been an active participant in the Modern Concert Dance Company since her freshman year; was a performing member of the May performance Tour in 1980 and served as its manager in 1981; was a cast member in the musical *Li'l Abner* in February 1981 and danced for the Renaissance Festival in 1980 and the Greek Festival in 1981.

She was a member of the Alumni Homecoming Queen's court in 1981 and 1982 and in the spring 1982 semester was one of two students selected from the campus by the Division of Social Science to participate in the Governor's Internship Program. She was one of twenty-five selected from over 400 interviewed from throughout the state and worked in the Governor's Office of Appointments for four months, for which she received twelve credits from Saint Leo and a stipend from the Governor's Office.

Vickie was also recently selected for inclusion in the *National Register of Outstanding College Graduates*, 1983 and has co-chaired the Guided Campus Tours for Admissions for this year.

**John E. Mulligan**, son of Mrs. Elizabeth F. Mulligan of Bedford, Massachusetts.

A senior with a cumulative grade point average of 2.89 and concentration in accounting he transferred from Bridgewater State College at the end of his freshman year.

In his sophomore year, he was on the Saint Leo Monarch Football Team.

In his junior year, he was Athletic Director of Kappa Alpha Sigma Fraternity; manager of the Monarch Snack Bar and Grill; and a Senator for the Student Government Association. In the summer of 1982 he was a delegate for the American Student Association National Convention in Washington, D.C. representing the College and also was an Assistant to the Summer Programs Coordinator at the College.

This year he is President of Kappa Alpha Sigma Fraternity and is Treasurer of the Student Government Association.

His aspiration is to have a career in the accounting profession.

**Donato Napolitano**, son of Mr. and Mrs. Albert Napolitano of Middletown, New York.

He is a senior at Saint Leo with a program concentration in biology and was the 1981 recipient of the Dr. Herbert F. Wolf Scholarship for Science and Mathematics.

An active member in its student tutorial program, he is a member of Gamma Alpha Honor Society, was a member of Circle K for two years; has been a teaching and laboratory assistant for two years in biology and chemistry, was a member of the College's Soccer Team for one year; and was a three year member of Lambda Chi Alpha National Fraternity, which is now defunct.

In addition, Napolitano is an experimental psychology lab assistant in research with neonatal rats under the supervision of Dr. Richard G. Bryan, Assistant Professor of Psychology.

A 1978 graduate of Middletown High School, he has worked as the foreman for Albert Napolitano Printing Contractors and as a volunteer medical technologist and pathologist's assistant for Elizabeth A. Horton Memorial Hospital in Middletown.

# COLLEGE STUDENTS

## "WHO'S WHO"

**Elizabeth I. "Totsy" Powers**, daughter of Mr. and Mrs. Allan J. Powers of San Antonio, Florida.

Totsy is a senior at Saint Leo with a concentration in physical education. She is a member of the Varsity Women's Tennis Team and has been all four years at Saint Leo. In addition, she pledged with Delta Phi Delta Sorority in her freshman year and is its President this year, having served in her sophomore and junior years as its athletic director. She was representative to Panhellenic in her sophomore and junior years, is a member of Gamma Alpha Honor Society; served as an Orientation Leader in her sophomore year; and has been a participant in intramural sports all four years.

She is a 1979 graduate of Pasco Comprehensive High School.

**Paul E. Salone**, son of Mrs. Frances Salone and the late I. Paul Salone of Englewood, Florida.

He is a senior with a program concentration in social work. In his freshman year he joined the College Union Board and served in his sophomore year as its Vice-President and last year as its President; was active in intramural sports, the Social Work Club and was initiated in Lambda Chi Alpha National Fraternity, the local chapter of which is now defunct. He also achieved membership in Gamma Alpha Honor Society and currently has a cumulative grade point average of 3.34.

In addition to the above memberships which continued, in his sophomore year he portrayed the role of Earthquake in *Li'l Abner* as a part of the annual musical presented by the Theatre Department and in his junior year the role of Roger in *Grease*.

Salone was named "Outstanding Student for 1980-81" and again in 1981-82; served as a Senator in the Student Government Association his junior year and again this year is the Co-chairman of the Student Library Development Committee; and was crowned the first Alumni Homecoming King last month as a part of Alumni Homecoming festivities.

**Theresa A. Schretzmann**, daughter of Mr. and Mrs. Joseph G. Schretzmann of Lake Butler, Florida.

The seventh of eleven children, Theresa is a senior with a concentration in the pre-law program. In her freshman year she began with the student newspaper, *The Monarch*, as a reporter, in her sophomore year she became the assistant editor and for the past two years has been the editor. In addition, she has served for four years as a Senator in the Student Government Association; has held membership all four years in College Ministry and Campus Music Ministry; was a cheerleader in her freshman and sophomore years; was an active member of the College Union Board for two years as well as the Karate Club; was President of her Sophomore Class; was in the Oratorio Chorus in her sophomore year; joined Circle K in her sophomore year and has served as a Board member for two years as well as being the Florida District Circle K Newsletter Editor for this year.

Schretzmann joined the Women's Varsity Softball team in her sophomore year, and is still a participant; has served for three years as an Orientation Leader; and has also held membership for two years in Pre-Law and Debate Society. She represented Saint Leo College at the Thirteenth Annual Student Symposium For The Center For The Study Of Presidency, in Washington, D.C., during March of 1982.

She is a 1979 graduate of Union County High School.

**Catherine Coleman Stanberry**, daughter of Mr. and Mrs. Robert E. Coleman of Warner Robins, Georgia.

Stanberry is a senior at Saint Leo with concentrations in music and vocal performances.

Her campus activities include the Saint Leo College Choir; Saint Leo Oratorio Chorus; Saint Leo Dance Company and Saint Leo College Theatre. In addition, she holds membership in the student chapter of the Music Educator's National Conference and is its Vice-President this year; is a member of Gamma Alpha Honor Society and serves on the Fine Arts Building Committee.

Her community activities include serving as a volunteer at Community General Hospital; serving as a volunteer in the Mike Bilarakis Congressional Campaign; serving as the guest director of the First Methodist Church Choir as well as teaching bible school at the same church; serving as a soloist for many community organizations and churches; serving as the musical coordinator for the "Miss Pasco County Pageant"; assistant director for the annual "Church Street Christmas" program in Dade City, FL; serving as the Senior High Church Choir Director for the Christmas Musical for 1980 at the First Baptist Church; and participating as a guest soloist at the Renaissance Festival sponsored by Pasco-Hernando Community College.

In 1981 she was the recipient of the Marion Elizabeth Flagg Scholarship for vocal performance, only awarded for outstanding music students; and in 1982 was the recipient of the Raymond L. and Mary C. Spangler Scholarship.

She is a 1977 graduate of Warner Robins High School and resides in Dade City, FL, with her husband, L. Keith Stanberry.

**Julie A. Tobey**, daughter of Mr. and Mrs. Phil Tobey of North Port, Florida.

Tobey is a junior at Saint Leo with concentrations in political science and education.

She served as President of her freshman class, has been a member of Circle K since her freshman year and serves as a Board member this year; served as a Senator to the Student Government Association in her freshman year, Secretary to SGA in her sophomore year and is Vice-President this year.

This year she is a member of the Pre-law and Debate Society; has served as a Resident Assistant in Marmion Women's Residence hall for two years and has been selected the "sweetheart" of Sigma Lambda Fraternity for the past two years.

In addition, she was selected "Outstanding Freshman", "Outstanding Sophomore", was sponsored by Circle K as a contestant for "Winter Queen" in 1981 and by Sigma Lambda in 1982. This year she is also a member of the SGA Student Library Fund Committee.

Tobey is a 1980 graduate of Venice High School.

**Lilliamely Valentin**, daughter of Johnny Valentin of Trujillo Alto, Puerto Rico, and Lilliam Garcia of Hato Rey.

A 1978 graduate of Libre de Musica, she is a member of Gamma Alpha Honor Society, has a cumulative grade point average of 3.79 and is a senior at Saint Leo with a concentration in music.

Since her freshman year she has been a member of the International Student Club, which recently became the International Student Association, and has performed as a representative from Puerto Rico, Spain, and the Dominican Republic at the Open House and in International Night festivities on campus. This year she has served as the coordinator for the initiation of the new Association.

She has been a member of the College Choir and the Oratorio Choir since her freshman year, including providing piano accompaniment for rehearsals, performing as a singer, flutist and soloist.

In her sophomore year, she was a member of the Modeling Club and coordinated fashion shows for the school. Last year she received a Humanities Scholarship and this year was the recipient of the Marion Flagg Scholarship for Excellence in Music. In her junior year she pledged with Psi Theta Epsilon Sorority and served as the coordinator for its social activities, as well as being a member of the Musical Monarchs.

This year she is a Resident Assistant in Villa Women's Hall, is a member of the Student Library Development Program, is a member of Panhellenic, the Music Educators National Council, and was a member of the 1982-83 Alumni Homecoming Queen's court.

Last year she was a song selector, reader and singer for the Spanish Masses at Saint Rita's Church in Dade City and this year is working with Sister Elaine from Holy Noame Priory in the Religious Program for spanish speaking children by teaching religion, correcting tests, making up bulletin boards for use in class and other similar projects.

Lily was recently selected to be a member of the world-acclaimed *Up With People* cast of 1983. *Up With People* has a two-fold purpose; to build bridges of understanding and communication between peoples and cultures and countries; and to give young people a learning experience that not only broadens the intellect, but matures the person.

(continued from page 1)

increased the chances of chemical interaction with adverse results, and her resistance was already low because of her not sleeping and eating well."

Said Cabot, "Some of the weaknesses actually worked in her favor in this case though. If she had not been as weak and drained physically, she might have stayed at the party longer and she could have gone into respiratory arrest at the party or enroute to the dorm. The chances of it happening were greater the longer she stayed at the party and drank. It is all a set of circumstances that worked out in her favor. She could have been left alone in bed that night and the possibility that she would not have survived that night would have been very great."

However, Gina and Joann did not leave the girl alone. Nor did they leave her alone when she was transported to the hospital where she had her stomach pumped and was resuscitated a fourth time in the emergency room.

Said Joann, "She was given an injection, and an I.V. to stop dehydration. Since she was considered to be pretty stable they put her in the cardiac unit with orders for a nurses check on her condition every fifteen minutes. She was not hooded up to an monitoring devices even though she had gone into respiratory arrest a total of four times so far that night and later that morning. We were concerned about this and decided that we should stay with her at the hospital."

Said Gina, "They wouldn't let both of us stay with her in the room so Joann elected to sit in the waiting room. It was while I was with her in the room that the girl went into respiratory arrest for the fifth time. I managed to find the call button and give her resuscitation till the hospital staff arrived at her room."

At 5 a.m. on Saturday morning, Gina and Joann left the hospital because the girl's vital signs had stabilized and because they were physically and emotionally drained.

Said Gina, "I just let it all go and started to cry. It seemed like a tremendous burden had finally been lifted off my shoulders."

Said Joann, "It's nice to know what to do in an emergency, but to have that feeling of relief when Cabot and the rescue squad walked in the door was even better. When she was at Community General we were more scared to leave her there than we were at the dorm with the rescue help. I am glad I had first aid training under Cabot or else she would have died. I wasn't going to take the course but I hadn't had first aid before and I thought I could use it. What an understatement!"

Said Gina, "We haven't even finished the rest of our first aid training and we had to use it. We had just been certified by Cabot in C.P.R. and mouth-to-mouth a couple of days before. As to the rest of the first aid training -- without knowing some of the serious symptoms that the girl had we wouldn't have known any better. We would have thought that she was just brought in drunk like the other girls who carried her to the dorm at the start of this whole incident. Thank God for Cabot's training and that first aid class!"

# GET TO KNOW US

By Stephen Adderley

## THE HEART OF THE CARIBBEAN: ANTIGUA AND BARBUDA

Antigua and Barbuda, nicknamed "The Heart of the Caribbean," are located about 350 miles southeast of Puerto Rico in the Caribbean Sea. Antigua, the largest of the three island grouping, covers 108 square miles, Barbuda follows with 62 square miles, and the third uninhabited island is Redona which is less than one square mile.

These islands were discovered in 1493 by Christopher Columbus on his second voyage to the New World. Antigua was originally called "Santa Maria de la Antigua," after a miracleworker to whom Columbus had prayed before his voyage. Settled and governed by the English from 1631, the tropical islands on November 1, of last year, achieved independence.

Tourism plays a major role in the economy of the islands. One of the main attractions is the annual, colorful, Carnival Festival. Carnival is the main focus of Antigua's cultural activity, it is usually held around the end of July to the beginning of August. Most of the visitors are fascinated by the Calypso music, Steel-band melodies, costumes, etc.

Other tourist attractions are water-sports, 33 luxurious hotels, casinos, the Sailing Regatta and 365 beaches. The Sailing Regatta is held once a year. Yachts from all over the world go to Antigua for a competitive "Sailing Week."

If you are interested in sports, Cricket is Antigua and Barbuda's national sport. Antigua has produced two of the world's finest players, Vivian Richards, a Premier Batsman, and Andy Roberts, a Fast-Bowler. In more familiar sports, Antigua has produced a world champion boxer, Maurice Hope. Other popular sports are Soccer, Cycling, Basketball and Track and Field.

If you have a vacation coming up why not come to Antigua and explore its beauty? Sun, fun and 365 beaches, one for everyday of the year, guarantee that you will want to return to these beautiful islands.

## Strange but True

By Pamela Schuessler  
Entertainment Editor

On Saturday, November 6, Dr. James F. Strange, Dean of the College of Arts and Letters at University of South Florida, was the speaker in a theology seminar sponsored by the Division of Philosophy and Theology. The topic of the Seminar was "Biblical Archaeology and Christian Faith" and consisted of three slide-lectures entitled: "Archaeology and the Life of Jesus."

The first lecture began at 10:00 A.M. and was held in Selby Auditorium. Dr. Strange spoke briefly about archaeology itself and what the science and practice require of an amateur, specifically: apprenticeship, study, languages and technical ability. He then brought to light recent discoveries in excavations attempting to trace the route of the Exodus through surface survey and the expressions of faith by the monks at Saint Catherine's Monastery near the site believed to be Mount Sinai. Dr. Strange revealed how important acute observation becomes in the field of archaeology - every detail of nature turns paramount.

In his second lecture he dealt with New Testament excavations in the Holy Land. Dr. Strange pointed out that it is easier to research this part of the Bible as opposed to the Old Testament, because of the smaller surface area and the briefer time span involved. But he also brought up some difficulties, one of which is the controversial status of archaeology in Jerusalem; the coalition government regards archaeology as "desecration." This attitude makes it very difficult for scientists to dig in historical areas, which are severely restricted.

Dr. Strange spoke of excavations at the Temple Mount in Jerusalem, at the city of Nazareth and the interesting excavation of Sepphoris which contained a Greek theater. He also brought up the ambiguous location of the true city of Caanan at Galilee. He mentioned in passing that Jesus, when he called the people "hypocrites" in a certain passage of the Bible, was in fact using a Greek word - for the word hypocrite is the greek term for "actor". Dr. Strange implied that perhaps the family of Jesus, since they were carpenters, worked at the site of the Greek theater in Sepphoris located near the city of Nazareth.

In his final lecture Dr. Strange dealt with how archaeologists go about elucidating the life of Christ. He elaborated on Essene Christianity and the Dead Sea Scrolls, upon which Dr. Strange has done extensive research. Throughout the years he has received world-wide recognition for his teaching and discovery. He actively participates in archaeological digs and lectures internationally. He is a published writer and author, along with being a man of wit and humor. His occasional bits of facetiousness while lecturing completed the rare epitomy of an intellectual with human warmth. His uniqueness lies in the fact that, although he possesses vast amounts of knowledge, he is not an ivory tower scholar. Nor is he solely concerned with "arts and letters;" he is also an expert in science and technology. This is no paradox, its rarity makes it seem like one.

# OUT OF MY HEAD

Satire By Jim Porto

## SHE LIKES THE CAFETERIA FOOD

November 21st was like any other day at Sain Leo College, except for one thing. I was sitting by my lonesome in McDonald Cafeteria, pondering what appeared to be some form of meat, when I chanced to notice a girl smiling.

Biologically speaking, it is not unusual for me to notice a girl, especially when she is attractive like this one, but there was something different about her that set her apart from all the others. It wasn't her cute smile, nor her soft melodic voice, not her deep dark eyes, it was the fact that she appeared to be enjoying her food. This was more interesting than the sex life of mollusks. I knew that I had to interview this girl.

She revealed her name to be Monica. I noticed that she was rather short, and queried to myself if this perhaps was due to the food. Monica is not only on the 3 meal plan, but plans to stay on the same plan next semester. Now that takes guts, and I'm surprised she hasn't lost hers yet. I was raptured by her personality and fascinated by her ability to eat. Why, if someone has left overs, she'll eat them. Yet, she is very thin. This made me wonder if there is any nutritional value in the food.

Monica had two salads, and even though the first one moved by itself, she didn't seem to mind. "John the Baptizer ate locusts," she said. Actually, I expect to see that as a slogan on T-shirts worn by the cafeteria workers.

Monica seemed to be the only person in the cafeteria enjoying her food. She would often say, "Mmmmm! This is delicious!" Realizing the implications of what she said, she would not let me tell you her last name.

Finally, when she was done, she said, "I wish they gave seconds." I could bear watching her enjoy her meal no longer, so I left in a mass of confusion. How could a modern, 20th century person actually like what we have to eat in the cafeteria? I may never know.

Note: The views expressed in this article are not necessarily those of the Board of Trustees, the Roman Catholic Church, the staff of the Monarch, or even the author himself, who has mysteriously disappeared--don't eat the meat.

## Student Profile: TOM GRANATO

By Willam Chauncey  
Monarch Correspondent

When one walks around Saint Leo, time is not usually taken to notice a new face and wonder who they might be.

It is even harder to find a good selection for a student profile, especially when everyone knows everyone else. Student profiles are written to give credit to those students that tend to be overlooked. These students deserve a lot more credit than they get.

The first profile is on a Senior, Tom Granato. Tom may go to Saint Leo College, but he is definitely a New Yorker. He was born and raised in Manhasset, Long Island. The change to a small town in Florida was a shock to him as a freshman, but he has survived.

As soon as Tom came to Saint Leo, he got involved. He is considered one of the founding fathers of Sigma Phi Epsilon, the only fraternity on Campus. His first year he was Sigma Phi Epsilon's recording secretary. For the last three years he has been the comptroller (Treasurer). He takes pride in his fraternity and is active nationally.

Why should students know him? Tom is the President of the Senior Class, participating actively in the Student Government Association. Last year, he was Vice-President of the Junior Class. He also is involved in Hall Government and is on the Judicial Board.

Participating in Intramurals, weightlifting and the nightlife keep him happy and healthy. Above all, Tom keeps a good grade point average. Thomas will graduate this year with a B.A. in Marketing.
